DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 6, 7, 8, & 10 of U.S. Patent No. 6,678,240 B2.

Although the conflicting claims are not identical, they are not patentably distinct from each other because independent claims 1 and 6 in the current application are a broader version of the claims allowed in the 6,678,240 patent. Lines 8-24 of claim 1 in patent 6,678,240 read on the claim limitations found in claim 1 in the current application. Lines 8-13 & 22-28 of claim 1 in patent 6,678,240 read on the claim limitations found in claim 6 in the current application. Dependent claims 2-5 & 7-10 are rejected by claims 6, 7, 8, & 10 of patent 6,678,240 B2, respectively.

Allowable Subject Matter

3. Claims 1-10 objected to as being dependent upon a rejected base claim, but would be allowable with the timely submission of a terminal disclaimer.

Art Unit: 2877

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1 & 6, the prior art fails to disclose or make obvious “representing the measured overall image defect as a linear combination of base functions of an orthogonal function set” and in combination with the other recited limitations of claims 1 & 6, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
